Introduction

CamCard is a professional business card reader. Simply take a picture of a business card, CamCard will recognize the business card and save the card information into Card Holder and your Android Tablet, and auto back up the data. You are able to view all your cards at ease, never missing, and restore your cards even though they somehow got deleted. CamCard supports to share the card by Email, QR Code, Excel and so forth.

The Main Features:

- ✔ Auto-enhance card image and recognize card information in quick and accurate, no need to edit
- ✔ Support multiple recognized languages
- ✔ Cloud backup, never missing, and all the cards can be restored in case of accidental deleting or changing phones
- ✔ Pay once for saving business cards without any limits
- ✔ Share the business cards anytime anywhere
- ✔ Auto-sync cards across multi-devices, and check the cards information on the web

Back
